

# NEW MCEWEN HIGH SCHOOL UPDATE

## HIGHLIGHTS

Tasks completed during June 2023:

- Concrete was poured for the addition to the 6-8 building.
- Site clearing and debris removal continued.
- Electrical updates to the 6-8 building approached completion. These updates were necessary to accommodate the addition.
- The removal of sidewalks and canopies was completed.
- More storm drains were installed.

## BEHIND THE SCENES

A few of the fun things happening behind the scenes are the selections of brick, interior colors, and other finishes. The primary exterior brick was recently selected. It is a beautiful brown-red brick that is a similar color to the brick on the old building and also coordinates nicely with the existing MES and 6-8 buildings.

## UPCOMING TASKS

One of the upcoming tasks is the laying of the block for the 6-8 building addition. The completion of the addition to the 6-8 building may occur as early as summer 2024. Completion of the new 9-12 building is scheduled for summer 2025. As always, timelines change during construction projects, but progress is being made daily.
