
NEW MCEWEN HIGH SCHOOL UPDATE

BUILDING UPDATES

- Site grading and trenching backfill commenced in preparation for foundation walls and floor slab for new 9-12 building.
- The sidewalk and canopy connecting the 6-8 building and the MES building was constructed.
- Fencing was installed around the 6-8 classroom exterior doors to allow for safe exit during an emergency and protection from the construction area.
- A temporary drive was put in place in front of the 6-8 building for pick-up and drop-off.

6-8 BUILDING ADDITION

- Interior vertical masonry wall construction began.
- Conduit and junction boxes began being installed.
- Openings in top of masonry wall were left in preparation for steel joists.
- Connection to the existing utility line began.
- An opening in the existing 6-8 building was created for connection to new addition.

UPCOMING TASKS

- Many of the tasks that were begun in July 2023 will continue throughout August.
- The building committee will be meeting in the upcoming weeks to review some of the furniture options for the new building and the 6-8 addition.
